The Specification is amended to: provide a descriptive title, update the patent family status of the present application, and comply with the sequence rules.

Applicants believe no new matter is added by the foregoing amendments.

I. Miscellaneous Issue

The Applicants respectfully bring the Examiner's attention to page 2 of the present Office Action. The Examiner states that claims 21-30 are pending in the current application. Applicants records do not indicate that claims 1-20 were ever canceled prior to the current amendment and response. Applicants also checked with PAIR and confirm that the originally filed claims were not previously canceled. The transaction history print out is attached for the Examiner's convenience. Applicants respectfully request that the Examiner confirm that originally filed claims 1-20 were not previously canceled. Applicants are proceeding to respond to the current office action presuming that original claims 1-20 have not been canceled previously.

II. Restriction Requirement

Applicants note that the Examiner found that examining binding compounds that bind to human and mouse DAP12 proteins would not be a serious burden. Applicants thank the Examiner for rejoining these two groups.

III. Objections to the Specification

The Examiner objected to the specification for the following reasons: failure to comply with the sequence rules, the requirement of a descriptive title, and the need to update the priority claim. Applicants have amended the specification above to address these issues, and believe the objections are now moot. Withdrawal of these objections is respectfully requested.

IV. Information Disclosure Statement

The Examiner noted that the specification contains a list of references that are not identified in the Information Disclosure Statement which was submitted on June 23, 2004. Applicants cannot identify such a list in the specification and respectfully request that the Examiner point out where this list appears. Applicants will correct any such oversight upon notice.

V. Objection to the Claims

The Examiner objected to claims 7-9 as being drawn to non-elected inventions. Claims 7-9 are canceled and the objection is therefore moot as to these claims. Applicants submit that new claims 21-38 are free from this rejection. In view of the foregoing, withdrawal of this objection to claims 7-9 is respectfully requested.

VI. Rejection of Claims 7-9 under 35 U.S.C. 112, Second Paragraph

The Examiner rejected claims 7-9 under 35 U.S.C. 112, second paragraph, on the basis that claims 7-9 are indefinite. Claims 7-9 are canceled and the rejection is therefore moot as to these claims.

Applicants submit that new claims 21-38 are free from this rejection. In view of the foregoing, withdrawal of this rejection is respectfully requested.

Conclusion

Applicants' current response is believed to be a complete reply to all the outstanding issues of the latest Office action. Further, the present response is a bona fide effort to place the application in condition for allowance or in better form for appeal.

Accordingly, Applicants respectfully request reconsideration and passage of the amended claims to allowance at the earliest possible convenience.

Applicant believes that no additional fees are due with this communication. Should this not be the case, the Commissioner is hereby authorized to debit any charges or refund any overpayments to DNAX Deposit Account No. 04-1239.
